P R O F I L E

Results-driven Full Stack Web Developer with over one year of experience in designing, developing, and implementing web applications and solutions. Proficient in both front-end and back-end technologies, including React, JavaScript, HTML5, CSS3, Node.js, Express, SQL, and NoSQL databases. Adept at working in agile environments, collaborating with cross-functional teams, and delivering high-quality code. Committed to staying up-to-date with industry trends and continuously learning new technologies to provide innovative and efficient solutions.

W O R K   E X P E R I E N C E

Front End Developer

Ezofis   2023-2024

- Developed and maintained web applications using Vue.js and React, ensuring seamless integration with back-end services.
- Implemented responsive design to enhance user experience across various devices.
- Collaborated with cross-functional teams to define, design, and ship new features.
- Optimized application performance to improve load times and efficiency.
- Utilized JavaScript and modern libraries to create interactive and dynamic user interfaces.
- Integrated SQL Server databases, ensuring efficient data retrieval and storage.

Project

Dms & Workflow management system

Technologies Used: Vue.js, React, JavaScript, SQL Server

Description:

- Developed and maintained the front end of a Document Management System (DMS) and Workflow Management System, enhancing the efficiency and user experience of document handling and process automation.
- Collaborated with back-end developers to design and integrate RESTful APIs for seamless data communication.
- Implemented dynamic user interfaces using Vue.js and React, providing users with a smooth and interactive experience.
- Enhanced application performance by optimizing code and implementing best practices for front-end development.
- Ensured data integrity and security by working closely with the team to implement robust authentication and authorization mechanisms.
- Created and maintained comprehensive documentation for the front-end codebase, ensuring ease of maintenance and scalability.
